Education

Islamic University of Technology (IUT)

B.Sc. in Computer Science & Engineering — CGPA: 3.63/4.00

Expected 2027

Dhaka, Bangladesh

St. Joseph Higher Secondary School

Higher Secondary Certificate (HSC) — GPA: 5.00/5.00

2022

Dhaka, Bangladesh

Competitive Programming & Achievements

- **Codeforces Expert** (peak rating 1692, handle: [rbwkai](https://codeforces.com/rbwkai)) — 1500+ problems solved across Codeforces, CSES, and other platforms (230+ on CSES alone)
- Represented IUT at **9 onsite Inter-University Programming Contests** (IUPC) against fields of 120–150 teams — best ranks: 17 (DUET 2026), 18 (NSU 2026), 19 (SUST 2026), 19 (AUST 2025)
- **Divisional Champion** (2018) and **3× National Qualifier** (2017, 2018, 2020), Bangladesh Mathematical Olympiad (BDMO)

Experience

IUTPC (IUT Programming Club) — Instructor

Official competitive programming club of IUT CSE

Since Jun 2024

Dhaka, Bangladesh

- Taught competitive programming fundamentals (DP, graph theory, data structures) to 50+ freshers across two batches
- Designed problem sets and mentored students, several of whom went on to compete in national-level onsite contests
- Problemsetter, IUT Intra Junior Programming Contest (2025, 2026); Judge, IUT Intra Programming Contest (2025)

Project Altair — Software Sub-team Member

IUT's Mars Rover Team

Since 2024

Dhaka, Bangladesh

- Worked on the rover's ROS-based automation pipeline for subsystem control and coordination — fixed bugs and improved overall performance
- Worked on rover OS-level integration and embedded automation for the rover's onboard system

Projects

Girih | C++, OOP | [GitHub](#)

- A declarative C++ geometry engine — compose points, lines, and circles as OOP primitives, drive them with parametric `Value` objects, and animate via keyframed interpolation, rendering procedural math animations in real time at 60 FPS at HD resolution

Musafir | React Native, Full Stack | [GitHub](#)

- Offline-first Islamic super-app (34 screens) featuring ILM, a RAG-based AI chatbot (LangChain, Ollama Llama 3.2, ChromaDB) trained on classical Islamic scholarship, for sourced Qur'an, tafsir, and hadith Q&A
- Semantic Qur'an & Hadith search via BGE embeddings with cross-encoder reranking, plus GPS-based Hanafi prayer automation (salah tracking, Qasr travel mode)

Pookieping | MERN Stack, Security | [GitHub](#)

- A deliberately vulnerable full-stack social wall (MERN, JWT auth) built as an XSS playground — a toggleable sanitization layer flips between vulnerable and hardened rendering to demonstrate stored-XSS exploitation and defense

Technical Skills

Languages: C++, Python, Java, Rust

Web & Backend: Spring Boot, React, React Native, Node.js/Express, MERN Stack

Databases: PostgreSQL, SQL

Systems & Tools: Linux, Bash, Git, ROS, Raspberry Pi, CTF / Web Security Fundamentals

Beyond the Technical

Advanced calisthenics athlete; traditional & digital artist with 1 yr hobby experience in 3D art (Blender); combat sports, origami, and Arabic learner; speedcuber (14.41s official WCA personal best).
